Professional Summary

Technical Product Owner and Fullstack Engineer with 4+ years of experience building AI-driven and human-centered digital products. Multidisciplinary background in software engineering, speech and language therapy, and intelligent systems design. Experienced in translating user and business needs into scalable AI solutions through product strategy, stakeholder collaboration, and agile delivery.

Experience

Founder & Technical Product Owner

June 2025 – Present

ReaddlyTech

Tunisia

- Led the design and development of an AI-powered adaptive learning platform for dyslexic children (Mobile + Web).
- Defined product vision, roadmap, and backlog using Agile frameworks (MoSCoW, RICE).
- Applied Lean Product principles and evidence-based prioritization to iterate on user feedback and validate product assumptions.
- Translated user needs (parents, teachers, therapists) into AI features (speech synthesis, text simplification, semantic visualization).
- Conducted user testing with 100+ families, achieving positive user engagement and early validation feedback.
- Coordinated a cross-functional team (Frontend, Backend, AI) and implemented microservices architecture.
- Designed go-to-market strategy and defined monetization model (freemium + subscription).
- Awarded the Tunisian Startup Act Label and selected in international innovation programs including AI Garage, Moovjee, and Arab IoT & AI Challenge.
- WEPs Signatory: Championed gender equality and inclusive workplace principles within the organization.

Fullstack Developer

Dec 2024 – Jun 2025

SCH Services

Canada (Remote)

- Developed and maintained a logistics SaaS platform supporting transportation and delivery operations.
- Built responsive business management modules and quotation workflows.
- Implemented CI/CD pipelines and deployment automation.
- Improved application performance and user experience.
- Collaborated with stakeholders to deliver scalable logistics solutions.

Fullstack Developer

Nov 2023 – Nov 2024

Yaiglobal

Tunisia

- Built web applications using React, Node.js, Laravel, and Python in a Scrum environment.
- Designed REST APIs and contributed to production maintenance.
- Collaborated with Product and Design teams to deliver user-focused features.

Fullstack Developer & Project Coordinator

May 2021 – Feb 2023

Bionic Soul

Tunisia

- Developed web and mobile applications for international clients.
- Designed and implemented frontend and backend features using modern JavaScript frameworks.
- Coordinated project delivery, sprint planning, and client communication.
- Participated in architecture design, testing, deployment, and maintenance activities.
- Worked directly with stakeholders to translate business requirements into technical solutions.

Education

Engineering Degree in Software Engineering (Cloud & DevOps)

2023 – June 2026

EPI Sousse

Bachelor's Degree in Computer Science

2020 – 2023

ISSET Mahdia

Bachelor's Degree in Speech and Language Therapy

2017 – 2020

Certifications

Professional Scrum Product Owner™ I (PSPO I)	2026
Scrum.org	

Projects

Virtual Lab (IaaS Cloud Platform)	2026
Graduation Project	

- Built a low-cost cloud platform using OpenNebula and KVM for student virtual environments.
- Automated VM provisioning and networking (PfSense, XML-RPC API).
- Managed full product lifecycle from MVP to deployment.

Smart factory AI platform (Industrial IoT & Computer Vision)	2025
Freelance	

- Contributed to the design of an AI-powered industrial monitoring platform for textile manufacturing.
- Collaborated directly with factory stakeholders to analyze workflows, identify operational bottlenecks, and define product requirements.
- Participated in the development of defect detection systems using computer vision and production monitoring dashboards (OEE tracking).
- Conducted field visits across multiple factories to benchmark processes and validate business needs.
- Coordinated communication between technical and operational teams to align product development with industrial constraints.

Retini (AI SaaS)	2024
Freelance	

- Developed an AI-powered image processing platform with scalable architecture.
- Improved processing speed and enabled concurrent usage.
- Implemented CI/CD pipelines for rapid deployment.

Aquadot (Management SaaS)	2023
Graduation Project	

- Led development of a management platform using Scrum methodology.
- Integrated predictive analytics for performance tracking.
- Conducted user story mapping and requirements analysis.

Epsica (Smart Health AI)	2022
Project Lead	

- Led development of a connected solution for early dyslexia detection.
- Awarded 2nd National Innovation Prize.
- Managed product vision and stakeholder communication.

Skills

Product Management: Product Discovery, Product Roadmap, Backlog Management, User Stories, Agile Prioritization, KPI Tracking, Lean Product Strategy, Evidence-Based Management (EBM), Stakeholder Management.

Agile Methodologies: Scrum, Kanban, Agile Delivery, SDLC, Sprint Planning, Product Lifecycle Management.

Tools: Jira, ClickUp, Trello, Figma, Miro, Notion, GitHub.

Technical Skills: React.js, Next.js, Node.js, Python, REST APIs, SQL/NoSQL, Docker, CI/CD, Microservices Architecture, Linux, Cloud Infrastructure.

Languages

French (Bilingual) | English (Professional) | Arabic (Native)
